Doc:

I just wanted to thank you for all of the wisdom you passed on to me since I purchased the DVD. This past Saturday night was the first event I worked since "studying" the DVD and I can honestly say it made a world of difference. There were some vicious KO's, (9 seconds) but I was in the correct position to stop the action without any harm to the participants. And there were also some interesting moments- one guy's cup fell out several different times during a match. So as you can imagine most of these fights are posted on youtube as family and friends recorded the bouts! And that's the true value of the DVD, very rarely do you see me in the footage, which means I heeded your advice and didn't over officiate, and maintained a proper position on the open side at the right distance. I received a lot of compliments from the State Commission as to the quality of my work. Can't wait to attend one of your live seminars! Again, many thanks.
